PROFILE

With 17 years of experience in real estate and construction, I specialize in managing and delivering medium to large-scale infrastructure projects. My expertise spans project implementation, monitoring and evaluation, feasibility studies, budget planning, and financial management. I have a strong track record of completing high-quality building projects with a focus on safety and precision. I've also collaborated extensively with government bodies, defense ministries, and private organizations. My professional growth is reinforced by continuous technical, leadership, and management training.

Mehedi Hasan Chowdhury

Chief Executive / Superior Electromechanical Services Managing Director / Design & Techlink Ltd.

Mob: +8801747231255
Mail: mehedi@sems.com

Responsibilities

- Managing stakeholder relations with landowners, clients, government bodies, and private firms; facilitating VIP site visits and participating in contract negotiations.
- Drafting and reviewing proposals and feasibility study reports; monitoring project progress via detailed schedules and reporting performance to senior leadership.
- Leading coordination with suppliers, contractors, and consultants to maintain workflow and project standards.
- Mentoring and supervising project managers, engineers, and site staff to meet project goals and enhance team performance.

Key Achievements

- Delivered medium to large-scale building and infrastructure projects, including residential and commercial buildings, government quarters, markets, and cyclone shelters in Dhaka, Chittagong, Sylhet, and Cox's Bazar.
- Completed various projects for the Bangladesh Army and Navy, such as the Army Officers Club at Dhaka Cantonment, an Auditorium Project at Bogra Cantonment, a Divisional Headquarters Building at Barisal, and numerous buildings for the Navy in Patuakhali.
- Effectively supervised a diverse team of engineers, consultants, and site-level workers, ensuring project milestones were met with high standards of quality and efficiency.

VOLUMEZERO Limited

Construction Manager | 2013 - 2016

Responsibilities

- Managed the construction of an 18-story LEED-certified commercial building, ensuring alignment with sustainability and design standards.
- Supervised site work to ensure adherence to approved drawings and specifications, providing feedback to architects and engineering teams.
- Coordinated with supply chain and contractors to secure materials and labor; led regular project meetings to drive progress and team motivation.
- Oversaw quality assurance, material testing, and strict implementation of safety protocols on-site.
- Tracked material usage, maintained construction documentation, and prepared detailed progress reports for senior management.

Key Achievements

- Successfully led the construction of a sustainable 18-story LEED-certified commercial tower with three basements.
- Oversaw structural work on the Shahjalal Islami Bank building on Gulshan Avenue, ensuring timely and high-quality execution.

Apan Builders Ltd.

Sr. Project Engineer | 2009 - 2013

Responsibilities

- Managed multiple infrastructure projects in Dhaka as Project Engineer, handling planning, scheduling, cost estimation, and stakeholder coordination for timely, code-compliant delivery.

Key Achievements

- Completed two high-end residential buildings in Baridhara Diplomatic Zone, ensuring top-quality standards and thorough project documentation.
